EIGHTH QUARTERLY REPORT (October 1, 2018 to December 31, 2018)

I. EXECUTIVE SUMMARY OF EIGHTH QUARTER'S ACTIVITIES (OCTOBER 1, 2018 – DECEMBER 31, 2018)¹

This is Independent Monitor Peter C. Harvey's Eighth Quarterly Report, which comments on the City of Newark (the "City") and Newark Police Division's ("NPD") progress with Consent Decree reforms during the period from October 1, 2018 to December 31, 2018.²

Appendix A provides a list of this quarter's key Consent Decree events.

Appendix B is the Monitoring Team's Compliance Chart, which assesses NPD's

progress with Consent Decree tasks.

Appendix C is the Probability Community Survey Final Report and summary

materials, which sets forth the results of the Monitor's annual survey of the Newark

community's experiences with and perceptions of NPD and public safety.

Appendix D contains the full report of the Monitoring Team's Non-Probability

Community Survey-a non-scientific survey that collects information on the public's

perceptions of NPD and public safety.

Appendix E provides the status of NPD's Consent Decree-related trainings.

Appendix F provides the status of NPD's new or revised Consent Decree policies

("General Orders").

¹ Unless otherwise stated, the City's and NPD's progress with respect to Consent Decree tasks, as described in this Quarterly Report, reflects developments as of December 31, 2018.

² For a more detailed introduction to the Independent Monitoring Team, the Consent Decree, and the Parties to the Consent Decree, please see the Monitoring Team's website: https://www.newarkpdmonitor.com/.

II. DETAILED STATUS UPDATE

A. NPD's Staffing Assessment and Modified Deployment Strategy

The way that a police department allocates its resources reflects its priorities. For this reason, a foundational requirement of the Consent Decree mandates that, at the outset of the Consent Decree, NPD assess and revise its officer staffing allocation (a "Staffing Assessment"), as well as create a deployment strategy ("Deployment Plan"), to strengthen the community policing presence in the precincts. (Consent Decree ¶ 15.) Specifically, Paragraph 15 of the Consent Decree provides that "[b]y July 9, 2017, NPD will assess and revise its staffing allocation and personnel deployment to support community policing and problem-solving initiatives, and will modify any deployment strategy that is incompatible with effective community-oriented policing."

NPD is committed to accomplishing this requirement and has taken steps to revise its staffing allocation and personnel deployment to support community policing and problem solving initiatives. During this reporting period (October 1- December 31, 2018), NPD submitted for review a Staffing Assessment of current deployments. This Staffing Assessment is a preliminary evaluation of NPD's future deployment strategy. We note that this Staffing Assessment was submitted for review more than two years into the Consent Decree. As of this report's publishing, NPD is still working, with technical assistance from the Monitoring Team, to develop a more comprehensive evaluation of its Staffing Assessment and Deployment Plan that will allow NPD to transition fully to a community-oriented policing and problem-solving model as required by the Consent Decree. NPD, through the City of Newark, agreed with the U.S. Department of Justice that it would adopt this policing strategy and deployment model. NPD will likely need to increase its deployment of street patrol officers in each precinct, ensure that those officers have ample time to engage with community members in a meaningful way, build

relationships of trust with them, and begin to evaluate officer performance by metrics that demonstrate their success in developing relationships with the community and implementing problem-solving efforts, and holding Precinct Commanders accountable for the quality of police service delivery and community engagement. This approach is distinguished from a purely numbers- or statistics- driven measurement of success that examines only the number of law enforcement actions taken (*e.g.*, the number of arrests or stops). Neither NPD nor the Monitoring Team can determine the full scope of changes without a comprehensive Staffing Assessment.

As background, the delay in developing a comprehensive Staffing Assessment and revised staffing/personnel Deployment Plan is due in large part to the limited budget that the City allocated to hire a policing expert to prepare an analysis for NPD. Staffing studies of this type for a major metropolitan city typically cost around \$100,000. The City allowed approximately \$17,000 to hire a staffing expert. This low budget may be attributable to the complexities of the bidding process that attaches to city contracts that exceed a certain dollar amount. Whatever the reason, the City, in our view, must allocate a sufficient budget to obtain a quality Staffing Assessment.

NPD's efforts to develop an overall Staffing Assessment and Deployment Plan have been ongoing. In May 2017, two months prior to the deadline established by the Consent Decree to complete this task, NPD retained a consultant to assess its staffing allocations and deployments. On September 12, 2018, over two years after the Consent Decree was filed and more than one year after the Consent Decree's July 2017 deadline, NPD submitted its Staffing Assessment to the Monitoring Team for review and comment. The Staffing Assessment revealed that NPD's police precincts are dramatically understaffed to handle calls for service, leaving

officers little time for community engagement and problem solving and in many cases, having insufficient units on the street to respond to 911 calls at certain times of the day. The Staffing Assessment also recommended that NPD assign additional patrol officers to its precincts in proportion to the number of service calls received in that area.

Shortly after NPD shared the Staffing Assessment with the Monitoring Team, NPD opened (and staffed) two additional police precincts, and executed several other organizational changes aimed at increasing precinct staffing, such as transferring all 46 police officer positions from the "Community Focus Division" to the individual police precincts. While it is true that NPD undertook these precinct changes to address the Staffing Assessment recommendation that additional staffing was required in the Precincts, it is difficult to determine how these staffing decisions will fit into an overall police deployment plan at this stage given the incomplete nature of the Staffing Assessment. It is clear, however, that these changes alone will not sufficiently address precinct staffing shortages.

NPD has not provided the Monitoring Team with a date on which it expects to complete the revised Staffing Assessment to support community policing and problem-solving initiatives as contemplated by Paragraph 15 of the Consent Decree. After this reporting period, NPD provided one of the Monitoring Team Subject Matter Experts with new data from NPD's Computer Aided Dispatch system concerning calls for service and the length of time needed to complete the assignment. NPD must incorporate this data into the revised Staffing Assessment. The Monitoring Team will continue to provide technical assistance to assist NPD in the completion of its obligations under Paragraph 15 of the Consent Decree.

NPD's delay in completing the Staffing Assessment and developing and executing an officer Deployment Plan that prioritizes community engagement has impeded its

compliance with Paragraph 15 of the Consent Decree and Consent Decree reforms. Indeed, at several community meetings hosted by the Monitor throughout the City, Newark residents have expressed concern to the Monitoring Team about inadequate officer staffing during particular times of the day and in certain neighborhoods. That concern also has been reflected in responses to surveys conducted by the Monitoring Team regarding (i) the lack of consistent police presence in many neighborhoods, (ii) delayed response time to service calls, and (iii) the absence of beat officers engaging with community members generally and in problem-solving initiatives. The current structure for community policing relies on the assignment of a few community policing officers to precincts, with only limited engagement by other precinct officers in community engagement as a part of their regular work due to response demands from 911 calls. The Newark community wants engagement by all officers in a Precinct, more regular police patrols and quicker response times.³

There is no doubt that to fully staff each precinct—and provide the level of police service that Newark residents want and deserve—the City should continue to hire additional police officers. Community-oriented policing is not a responsibility relegated to a few NPD officers, whether they are designated as "Community Service Officers," "School Resource Officers" or some other title. NPD also will have to ensure that its Precinct Commanders focus on holding their officers accountable for building relationships with community members and problem solving, in addition to the traditional metrics of reducing crime and solving cases.

³ Results from the Community Probability Survey, discussed below, suggest that community members want NPD to provide more regular police patrols and a quicker response time to service calls. As discussed in section II(B) of this Report, for example, survey respondents reported that their feelings of safety increased with more frequent police patrols. Additionally, 80% of respondents reported that they would like to see an increase in the number of NPD officers patrolling their neighborhoods. In fact, 31% of the survey participants answered that Newark police "rarely" or "never" respond to 911 calls quickly enough. *See* Appendix C.

NPD should complete its revised Staffing Assessment as soon as possible. It should then develop a Deployment Plan that reflects the results of its Assessment. The implementation of community policing is long overdue.

B. Surveys

The Consent Decree requires the Monitor to conduct an annual survey "of the Newark community's experience with and perceptions of NPD and public safety." (Consent Decree ¶¶ 22-23.) The Monitoring Team has addressed this Consent Decree requirement by conducting three annual surveys, which will be described in more detail below: (1) a Probability Community Survey; (2) a Non-Probability Community Survey and (3) a survey of police officers. Each of these surveys serves a different purpose.

The Community Probability Survey is a *telephone* survey conducted using statistical sampling techniques that allow the Monitoring Team to glean the perceptions of NPD policing across all Newark residents based on the results provided by a scientifically selected random sample of residents. The questions used in connection with this survey are the same as those used in the baseline probability survey conducted by the Monitoring Team in 2016-17. Thus, the data gathered from the survey allows the Monitoring Team to measure changes, if any, in Newark residents' experiences with and perceptions of NPD and public safety over time.

The Non-Probability Community Survey of Newark residents *in person* on the street (also known as a "street survey") attempts to capture the experiences and perceptions of Newark residents, including those who may not have participated in the phone survey. The street survey was conducted using a modified version of the Community Probability Survey instrument. Because the street survey was not administered using sampling techniques, the results cannot be extrapolated from the individual survey responses to the Newark community at

large in the same way that the results from the Community Probability Survey can be extrapolated. Nonetheless, the street survey can help NPD to identify current and recent issues or concerns specific to Newark.

The Police Survey provides data on *officer attitudes* on a range of issues primarily relating to how officers perceive they are being treated by NPD's leadership.

The Monitoring Team has completed its Community Probability Survey and Non-Probability Survey and discusses the findings from both surveys below. The Monitoring Team will present the results of its Police Survey in a subsequent Quarterly Report.

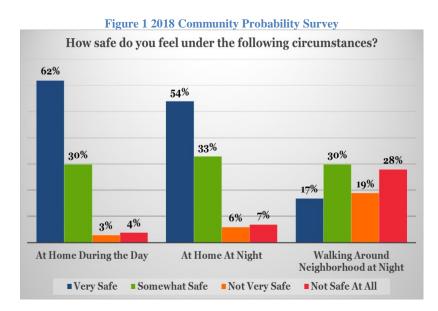

1. Community Probability Survey (Telephone Survey)

As reported in the Seventh Quarterly Report (July 1 – September 30, 2018), the Monitor engaged Suffolk University Political Research Center ("Suffolk"), led by Director David Paleologos, to carry out the second-year probability survey. From September 9 to September 30, 2018, Suffolk conducted phone interviews with 700 Newark residents—92 by landline and 608 by cell phone—who were distributed across the Central, East, North, South, and West wards. Suffolk selected survey respondents randomly from a sample pool of over 61,000 Newark residents. Starting from a pool of over 61,000 Newark residents, Suffolk randomly selected a stratified sample of survey respondents that matched Newark's census demographics with respect to age, sex, level of education, race/ethnicity, and ward. This permits statistically valid conclusions to be extrapolated to the community as a whole. The survey followed the industry standard of a 1.96 standard deviation at a 95% level of confidence for a margin of +/-3.7 percentage points.

As mentioned above, in administering the second annual probability survey Suffolk used the same questions that were developed by the Monitoring Team and the Parties for the baseline survey. This allows for a year-over-year comparison of Newark residents'

experiences with and perceptions of NPD and public safety. The second annual survey is now completed. (A summary of Suffolk's second annual survey findings and the full report and analysis are attached to this Quarterly Report as **Appendix C**.) The survey results show some positive signs of NPD's progress in changing the perception of safety in Newark communities.

Suffolk identified a number of interesting shifts in survey responses from the firstyear survey. For example, survey respondents reported feeling safer in their homes (54% reported feeling "very safe," **up** eight percentage points from last year) and walking around their neighborhoods at night (17% reported feeling "very safe," also **up** eight percentage points from last year).

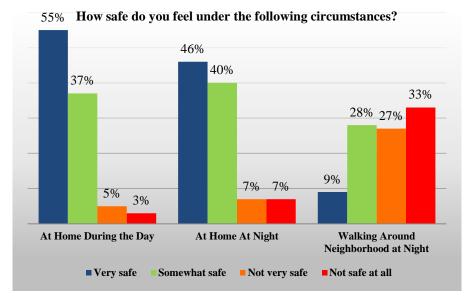

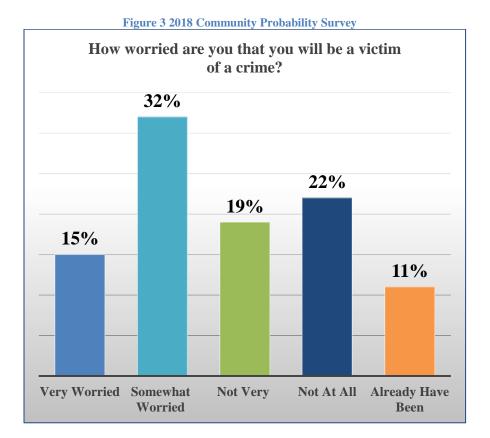

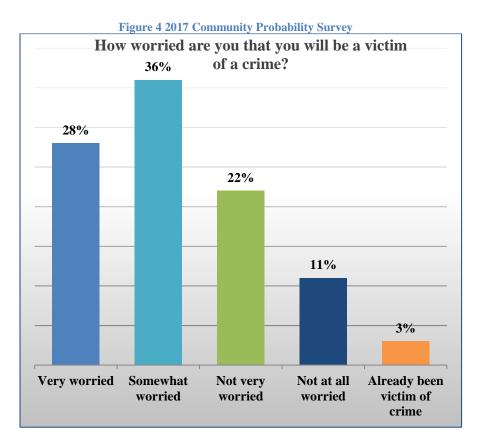

Figure 2 2017 Community Probability Survey

When asked about the level of concern they felt regarding the possibility of excessive force being used on them if they were stopped by an NPD officer, a 9 point decrease can be seen in those who felt "somewhat concerned" (16%) and a 10 point increase in those who were "not at all concerned" (37%). Similarly, survey respondents were less concerned about being the victim of a crime compared to first-year respondents.

The survey revealed substantial increases in the percentage of Newark residents who obtain information about NPD from the Internet and social media. NPD should consider using more social media and other Internet tools to both better communicate with the public and improve its transparency and community relations.

Suffolk's recommendation (which the Monitor endorses) is that NPD establish an *Instagram* page and hire a civilian social media manager to maintain it.

2. Non-Probability Community Survey (Street Survey)

The Monitoring Team, led by the New Jersey Institute for Social Justice ("NJISJ"), completed its second non-probability community survey. On Saturday, November 17, 2018, from 12:00pm to 2:00pm, NJISJ led a city-wide "street survey" throughout Newark's five wards to collect information on the public's perceptions of NPD and public safety. The street survey was conducted by 18 volunteers, consisting of NJISJ staff and local law students. A team of two or three volunteers was assigned to each ward, with suggestions from NJISJ and other community organizations on where to find heavy foot traffic. The questions used in the street survey were the same as those used in the Monitoring Team's first year street survey. Pedestrians agreeing to complete the survey could respond by stopping and filling out the survey themselves, having the volunteer read the questions aloud and record the answers, or taking a copy of the survey with them and returning a completed version to NJISJ later.⁴ The team collected approximately 81 responses. (The results of the Non-Probability Survey are attached as **Appendix E**.)

The data gathered from the street survey provides insight into the experiences, perceptions and attitudes of individual Newark residents about policing in the city. Additionally, much like community members' comments during community events, these responses shed light on issues of concern to the community. On the whole, the results of the second-year street survey are similar to those of the first. The survey responses contained some encouraging results: for example, over 40% of respondents indicated that they have "a lot" of respect for Newark Police in general, compared to only 17% who reported having "none at all;" almost two-thirds of survey respondents reported feeling at least "somewhat safe" in their neighborhood during the day; and 63% indicated they would like to see an increase in the number of NPD officers patrolling their neighborhood, compared to only 10% who wanted a decrease.

But the survey responses also revealed some troubling results: for example, (1) over half of respondents reported feeling "not very safe" or "not safe at all" walking around their neighborhood at night; (2) 40% of respondents indicated they were "not very likely" to ask for

⁴ Surveys were available in English, Spanish, and Portuguese.

help from an NPD officer if they were in need of assistance; (3) when asked how much trust they had for NPD, 32% said they have "none at all;" and (4) over half of respondents believed that if they were to file a complaint with NPD, their complaint would not be adequately investigated. A majority of respondents believed that use of body-worn cameras would improve relations between NPD and the community and increase trust of NPD.

C. Consent Decree Trainings

During this reporting period NPD continued administering training to NPD personnel based on (a) Use of Force, (b) Consensual Citizen Contacts and Investigatory Stops, (c) Searches With or Without a Search Warrant, and (d) Arrests With or Without an Arrest Warrant. These training sessions used training materials approved by both DOJ and the Monitoring Team. SMEs from the Monitoring Team observed 20 training sessions in total, including 13 Use of Force and 7 Stops, Searches and Arrests training sessions. NPD also reports that by December 31, 2018, all relevant NPD officers had been trained on body-worn and in-car cameras. (For the status of each of NPD's Consent Decree-related training, see **Appendix E**.)

As of the close of this reporting period, NPD had not yet finalized a contract with a vendor hired to develop its Bias-Free Policing training curriculum. However, after the close of this reporting period, NPD retained Fair & Impartial Policing, LLC ("FIP"), a provider of implicit-bias-awareness training for law enforcement in the United States and Canada, to develop its Bias-Free Policing training curriculum. In April 2019, FIP began to deliver components of its Bias-Free training to mid-managers, command staff and community members. These components are not the final product on which officers will be trained. NPD must incorporate Newark-specific scenarios and content that is uniquely applicable to its police force and its City

in order to comply with the Consent Decree. The Monitoring Team looks forward to reporting on NPD's progress administering the training in future quarterly reports.

Also during this reporting period, NPD and DOJ report their continued collaboration to assist one of DOJ's training vendors to develop an internal affairs training curriculum and procedural manual to provide investigative guidance and protocols for detectives assigned to NPD's Office of Professional Standards ("OPS"), the name for NPD's internal affairs unit. Because the Parties have not provided drafts of these materials to the Monitoring Team, we are not in a position to comment on them. It is the Monitoring Team's understanding and expectation that the procedural manual will address Consent Decree Paragraph 149's requirement that NPD develop capabilities for consistent tracking of complaint, investigation, and disciplinary data.

D. Consent Decree-Related Policies

As of the filing of this Report, NPD has put into effect 14 of 16 new or revised Consent Decree-related policies. Only two policies required by the Consent Decree remain to be put into effect by the Public Safety Director, both of which are critical for a renewed focus on internal affairs: (a) Complaint Intake and Investigation (OPS/Internal Affairs), and (b) Disciplinary Process and Matrix. (For the status of each of NPD's new or revised Consent Decree-related policies, including when those policies became effective, see **Appendix F**.)

NPD is nearing completion of its Complaint Intake and Investigation policy, which is among the most critical Consent Decree benchmarks in this area. In its current form, the draft policy already represents a significant improvement over its predecessor as it addresses many process gaps that limited NPD's ability to reliably assess, report on, and most importantly,

notify complainants of the status of investigations, as envisioned by Paragraph 125 of the Consent Decree.

Specifically, the revised policy requires the assignment of an *Event Number* to every external complaint upon intake. NPD personnel taking complaints will provide the *Event Number* to the complainant so that the complainant has a clear reference number that can be used to seek and receive updates on the status of the investigation into his or her complaint. In the past, external complaints were not assigned a tracking number until OPS, or its designee, incorporated the substance of the complaint and the complainant's demographic data into an Investigation of Personnel form ("IOP"). In some instances, there was a time lapse between intake and transfer of the complaint information into an IOP. Under the newly revised policy, NPD will continue to assign unique identifiers to the IOP that will correspond to the *Event Number* provided to the complainant at intake. This process will improve NPD's ability to track investigations and update complainants accordingly.

During the previous reporting period, the Monitoring Team asked the Parties whether or to what extent investigators would consider the prior conduct of the officer who is the subject of an internal affairs complaint in connection with a pending complaint. Paragraph 128 of the Consent Decree states that "NPD policy will require that investigators consider *patterns in officer behavior* based upon disciplinary history and other information in NPD's Early Warning System (EWS)," (emphasis added) but does not clearly state the purpose of the review — e.g., whether the past conduct would be used as part of assessing the officer's compliance with policy in the pending investigation or merely used to assess what discipline might be imposed in case of a policy violation. During this review period, the Parties moved closer to resolving the issue. They agreed in principle that an officer's disciplinary history and prior OPS investigative files

may contain information that may be helpful in (1) assessing the appropriate level of discipline for proven misconduct and (2) identifying any potentially problematic patterns and practices during a pending investigation.

After the end of this reporting period, the Parties resolved the issue by incorporating into the draft Complaint Intake and Investigation policy (General Order) two pertinent provisions: First, they added a provision requiring that, upon completion of any internal investigation, OPS review the subject officer's disciplinary history and Blue Team entries to detect potentially problematic patterns and practices of force, vehicular pursuits, and similar activities that may bear on the conduct alleged in the complaint. Second, they added a provision requiring that, during the course of an open investigation, Investigators would consider patterns in officer behavior drawn from disciplinary history and other sources of information, including NPD's Early Warning System. Although this review may not itself dictate the outcome of a pending investigation, the investigators would be able to consider information obtained from prior investigations - among all of the other evidence they obtained - to assess whether the present case presented similar fact patterns or reflected an apparent *modus operandi* for one or more parties involved.

In October 2018, NPD notified the Monitoring Team of its intent to further amend the draft *Complaint Intake and Investigation* policy to incorporate the provisions of Paragraphs 107 and 108, which aim to ensure that NPD takes appropriate action to prevent, deter, and respond to potential theft by those employees who routinely handle valuable contraband or cash. Under the revised policy, NPD command level Supervisors will periodically review the disciplinary histories of their subordinate officers to determine whether the officers have been

the subject of internal investigations alleging theft, dishonesty, and similar conduct relating to issues of professional integrity.⁵

After the close of this reporting period, on June 18, 2019, the Monitor approved NPD's revised Internal Affairs and Complaint Intake policy. The policy will go into effect once it is authorized by the Director of Public Safety.

The Monitoring Team will continue to track the development of these crucial policies in future quarterly reports.

E. Independent Monitoring Team's Community Events

Paragraph 186 of the Consent Decree requires the Monitor to hold community meetings to discuss its Quarterly Reports, inform the public about the City's and NPD's progress with Consent Decree reforms, and receive community comments on their experiences with NPD. As part of this outreach, the Monitor holds periodic community forums in different locations throughout Newark. On October 12, 2018, the Monitoring Team released its Second-Year Reassessment. On December 11, 2018, the Monitoring Team held a community event at Central Assembly of God Church in Newark, which was hosted by the Urban League of Essex County and coordinated by NJISJ, to discuss its Second-Year Reassessment. The event was attended by members of the Monitoring Team, DOJ, the community, and NPD's CDPU. However, neither NPD's Public Safety Director, a representative from the City of Newark, nor local NPD precinct leadership attended the event. In the future, leadership from the City and NPD (other than members of the CDPU) should make an effort to attend community events to listen and respond to community members' questions and concerns.

⁵ Because the amended policy directly impacts the duties and responsibilities of its Supervisors, NPD also revised G.O. 80-1, *Responsibilities of Command and Supervisory Personnel*, to reflect these changes.

III. NEXT QUARTER ACTIVITIES (JANUARY 1, 2019 – MARCH 31, 2019)

A. Audits

After the close of this reporting period, the Monitoring Team requested NPD's attendance records for the following Consent Decree-related trainings: (i) community-oriented policing, (ii) body-worn cameras and in-car cameras; (iii) use of force; and (iv) consensual citizen contacts and investigatory stops, searches with or without a search warrant, and arrests with or without an arrest warrant. The Monitoring Team will use this information to assess NPD's compliance with the paragraphs of the Consent Decree requiring training in such areas.

As the Monitoring Team prepares to conduct compliance audits in some Consent Decree areas, NPD's data systems—as they currently exist—remain inadequate to meet Consent Decree requirements in many other areas. NPD's data systems are not capable of producing and delivering to the Monitoring Team the information required to permit an audit of NPD's compliance with the Consent Decree. Thus, many of the substantive audits required by the Consent Decree cannot be performed by the Independent Monitor unless and until NPD's data systems are upgraded.

B. Youth Engagement

From May to September 2018, Dr. Delores Jones-Brown of the Monitoring Team conducted "listening sessions" with groups of youth across the city of Newark, to collect and report on their experiences with and perceptions of NPD. (*See* Consent Decree ¶¶ 22-23.) The Monitoring Team also sought their suggestions for creating more positive interactions between Newark youth and the police. The Monitoring Team will report on the results of these listening sessions in its next (Ninth) Quarterly Report, covering the period from January 1 through March 31, 2019.

The Monitoring Team will continue to discuss with NPD the necessity of developing a comprehensive youth engagement strategy that will invite participation from Newark youth—both in school and those who have dropped out of school—to develop practical strategies to prevent crime and solve neighborhood problems.

IV. APPENDICES

- A. Chronology of Key Events
- **B.** Compliance Chart
- C. Probability Community Survey Final Report and Summary Materials
- D. Non-Probability Survey Report
- E. Training Status Update Chart

Appendix A

Timeline (Meetings, Milestones and Events)

Monitoring Team's Eighth Quarterly Report — October 1 through December 31, 2018.

Date	Event
October 12, 2018	The Monitoring Team files its Second Year-Reassessment.
October 24, 2018	The Newark Police Division ("NPD") conducts first Use of Force training session.
October 30, 2018	NPD holds Community & COPS Town Hall to discuss its Disciplinary Process and Matrix policy.
November 8-9, 2018	NPD conducts "pilot" training sessions of its Stops, Searches, and Arrests training.
November 12, 2018	NPD holds LGBTQ Policy Discussion to discuss its draft LGBTQ Community and Police Interaction Policy.
November 17, 2018	The New Jersey Institute for Social Justice conducts a street survey throughout Newark's five wards to assess Newark residents' perceptions of NPD and public safety.
December 3, 2018	The Center of Policing at Rutgers University, working with NPD, administers its first officer perception survey.
December 4, 2018	Independent consultant presents findings from its review of NPD's data systems to the Monitoring Team.
December 11, 2018	The Monitoring Team holds its Second-Year Reassessment community event at Central Assembly of God Church.
December 28, 2018	NPD holds focus group with officers to discuss proposed changes to NPD's "Stop Report" and to discuss officer impressions of NPD's Consent Decree reform efforts.
December 31, 2018	NPD reports that by this date all patrol officers were trained on body- worn and in-car cameras.

I. <u>DEFINITIONS</u>

NPD's compliance with the deadlines set forth in the Consent Decree and the Second-Year Monitoring Plan will be assessed using the following categories: (1) not assessed, (2) initial development, (3) preliminary compliance, (4) operational compliance, (5) non-compliance, (6) administrative compliance, and (7) full compliance. Each of these terms is defined below.

1. Not Assessed

"Not Assessed" means that the Monitoring Team did not assess the Consent Decree provision during this reporting period. Acceptable reasons for why a requirement was not assessed may include that the deadline has not passed or some other substantive reason.

2. Initial Development

"Initial Development" means that during the auditing period, NPD has taken meaningful steps toward achieving compliance with a Consent Decree requirement that is not yet scheduled for completion. Initial Development will be noted only if NPD's efforts are consistent with established timeframes in the Monitoring Plan or Consent Decree. Where NPD was expected to have achieved at least Initial Development during the auditing period, and has not, NPD has been found not to be in compliance.

3. Preliminary Compliance

"Preliminary Compliance" means that during the reporting period, NPD has developed, and the Independent Monitor, DOJ, and City have approved, respective policies or standard operating procedures ("SOPs") and related training materials that are consistent with a Consent Decree requirement. This category only applies to SOPs and training.

Case 2:16-cv-01731-MCA-MAH Document 158-1 Filed 08/09/19 Page 27 of 179 PageID: 2318

4. Operational Compliance

"Operational Compliance" means that NPD has satisfied a Consent Decree requirement by demonstrating routine adherence to the requirement in its day-to-day operations or by meeting the established deadline for a task or deliverable that is specifically required by the Consent Decree or Monitoring Plan. NPD's compliance efforts must be verified by reviews of data systems, observations from the Monitoring Team, and other methods that will corroborate its achievement. In this report, the Monitoring Team only will assess NPD for compliance with established deadlines.

5. Non-Compliance

"Non-Compliance" means that NPD has either made no progress towards accomplishing compliance, or has not progressed beyond Initial Development at the point in time when NPD is expected to have at least achieved Preliminary Compliance for the reporting period.

6. Administrative Compliance

"Administrative Compliance" means that during the auditing period, NPD has completed all necessary actions to implement a Consent Decree requirement, but General Compliance has not yet been demonstrated in NPD's day-to-day operations.

7. Full Compliance

"Full Compliance" means that all Monitor reviews have determined that NPD has maintained Operational Compliance for the two-year period.

II. <u>USE OF FORCE</u>

Achievement	Deadline for Achievement	Status	Discussion		
Develop Use of Force Policy: NPD will develop and implement a use of force policy or set of policies that cover all force techniques, technologies, and weapons that are available to NPD officers. The policy or policies will clearly define each force option and specify that unreasonable use of force will subject officers to discipline. (¶¶ 66-74)					
NPD will review and revise its current use of force policy or policies to ensure compliance with Consent Decree.	March 31, 2018	Preliminary Compliance	See Eighth Quarterly Report, Appendix F.		
NPD will ensure that officers have received, read and understand their responsibilities pursuant to the policy or procedure and that the topic is incorporated into the in-service training required. (\P 11)	Within 60 days after approval of policy	Preliminary Compliance	See Eighth Quarterly Report, Section II(C).		
NPD will provide drafts of new or revised training plans or training curricula to the Monitor and DOJ for review and approval prior to implementation. (¶ 11)	Within 60 days after approval of policy	Preliminary Compliance	See Sixth Quarterly Report, Section III(B)(1).		
NPD will develop a protocol to gauge retention of training and approve testing mechanisms to ensure compliance with Consent Decree.	45 days before training is implemented	Preliminary Compliance			
NPD will provide the proposed testing for review.	30 days before training is implemented	Preliminary Compliance			
Audit of NPD Firearms Certification Oversight (¶¶ 70-71, 74)					
NPD will provide resources for officers to maintain proper weapons certifications and will implement sanctions for officers who fail to do so. Officers will be prohibited from using unauthorized weapons or ammunition. (¶¶ 70-71, 74)	Ongoing	Not Assessed	The Monitor will assess this requirement during compliance audits.

Appendix C

NEWARK, NEW JERSEY COMMUNITY SURVEY

SUFFOLK UNIVERSITY POLITICAL RESEARCH CENTER DAVID PALEOLOGOS, DIRECTOR DECEMBER 2018

ABOUT THIS SURVEY

This report was prepared at the request of Peter C. Harvey, Independent Monitor of the Consent Decree signed by the City of Newark and the United States Department of Justice.

Paragraphs 22 and 23 of the Consent Decree require that the Independent Monitor conduct a reliable, comprehensive, and representative survey of the Newark Community's experience with and perceptions of the Newark Police Division and public safety.

STATEMENT OF METHODOLOGY

This poll was conducted between September 9, 2018 and September 30, 2018 using a sample of 700 residents distributed nearly equally across the Central, East, North, South, and West wards of the city. This poll follows the industry standard of a 1.96 standard deviation at a 95% level of confidence for a margin of +/-3.7percentage points.

As sample size decreases, sampling error increases, therefore statements based on various population subgroups may be more subject to error than those based on the total sample available.

KNOWLEDGE OF CONSENT DECREE

How much have you heard about the Newark Consent Decree before taking this survey?

KNOWLEDGE OF NEWARK PD

- 2017 vs. 2018 Results
 - Tier 1 Movement
 - Tier 2 Movement

SURVEY COMPARISONS

TIER I: SIGNIFICANT MOVEMENT

- 1. Increased feelings of general safety
- 2. Less worry of being victim of a crime
- 3. Less worry of the use of excessive force
- 4. Decrease in feelings of being discriminated against by NPD
- 5. Increase in usage of social media as information source
- Positive economic changes in Newark employment and housing

TIER 2: SIGNIFICANT MOVEMENT

- 1. Fewer formal complaints filed with NPD
- 2. Increase in satisfaction with results
- 3. Fewer residents report being stopped by NPD
- 4. Decrease in safety concerns during stops
- 5. More see stops as legitimate
- Less confidence that NPD handles evidence properly or tells the truth
- 7. Decrease in feeling safe when NPD is nearby

Case 2:16-cv-01731-MCA-MAH Document 158-1 Filed 08/09/19 Page 61 of 179 PageID: 2352

CONCLUSIONS & ANALYSIS

Case 2:16-cv-01731-MCA-MAH Document 158-1 Filed 08/09/19 Page 101 of 179 PageID: 2392

GENERAL CONCLUSIONS

- Disassociation between positive firsthand experiences and negative media consumed
- NPD officers should be integrated members of the community, not just protectors or enforcers of the law
- NPD may consider bolstering presence on online social media platforms

MAJOR RECOMMENDATIONS

- Increase communications and highlight positive interactions between NPD and citizens
- Professional social media expertise and positive citizen testimony is key
- Host and participate in community events consistently
- Image is not enough; back up words with continual improvements in police practices

Case 2:16-cv-01731-MCA-MAH Document 158-1 Filed 08/09/19 Page 103 of 179 PageID: 2394

Case 2:16-cv-01731-MCA-MAH Document 158-1 Filed 08/09/19 Page 104 of 179 PageID: 2395

SURVEY WEAKNESSES

- Continuing to replicate the survey as previously written may not be enough going forward
- Disparities between perceptions of life in Newark overall and the NPD are glaring
- Adding new questions to address citizens' perceptions of city officials, as well as other departments and services aside from the NPD could further clarify the relationship between residents and the city

INDEPENDENT MONITOR

NEWARK POLICE DIVISION CONSENT DECREE 2017-2018 COMMUNITY PROBABILITY SURVEY

The following contains an analysis of the 2017-2018 Newark survey conducted by Suffolk University. The focus of this analysis will be on key movement which has proven to be greater than the margin of error and indicative of possible new trends or directions of public opinion.

Suffolk University Political Research Center (SUPRC)

David Paleologos Director, SUPRC Suffolk University Professor

Merideth Power-Ayer, Senior Program Coordinator

Keith Horvath, Special Consultant to Director Michaela Giandello, Political Data Analyst Desiree Pelletier, Political Data Analyst

December 2018

Established in 2002 and based in Boston, the **Suffolk University Political Research Center** (**SUPRC**) conducts statewide and national surveys as well as bellwether polls. It examines political races and analyzes voters' opinions on key issues. Suffolk University polls have predicted outcomes in key states including New Jersey, Arizona, Pennsylvania, Minnesota, Wisconsin, Maine, Colorado, Florida, Nevada, New Hampshire, Ohio, Pennsylvania, and Virginia.

Having conducted extensive polls and bellwether surveys in the 2004 presidential election and beyond, SUPRC has now expanded its reach overseas. Suffolk was the only US university to poll the 2017 French election. The Center found that Emmanuel Macron led his opponent, Marine Le Pen, by 16 points in the run-up to France's presidential runoff. Macron went on to win by a comfortable margin.

SUPRC Director **David Paleologos** has worked at Suffolk University since 2002. He is also a lecturer in the Government Department, where he teaches Political Survey Research each spring. Students in this course are immersed in questionnaire design, sampling, interviewing, coding data, and analyzing results. In 2018, Paleologos successfully partnered with numerous media outlets including USA TODAY, the Boston Globe, Arizona Republic, York Daily Record, Cincinnati Enquirer, Reno Gazette Journal, Saint Cloud Times, Milwaukee Journal Sentinel, and six Florida newspapers.

Before entering academia, he was one of the most sought-after pollsters and field operatives in Massachusetts. Paleologos gives frequent guest lectures on the political survey process at many Boston-area institutions. In 2018, Paleologos was invited to present his outlook for the 2018 midterms and 2020 presidential election to 30 members of Congress in Washington, D.C. A graduate of Tufts University, he is a member of the American Association of Public Opinion Researchers and the Northeast Political Consultants Association. The Rendon Group voted him "Pollster of the Year" at their inaugural ELKEY Awards in 2015.

Introduction

This report was prepared at the request of Peter C. Harvey, Independent Monitor of the Consent Decree signed by the City of Newark and the United States Department of Justice. Paragraphs 22 and 23 of the Consent Decree require that the Independent Monitor conduct a reliable, comprehensive, and representative survey of the Newark Community's experience with and perceptions of the Newark Police Division and public safety.

Statement of Methodology

The poll fieldwork was conducted between September 9, 2018 and September 30, 2018 and interviewed 700 Newark residents distributed nearly equally across the Central, East, North, South, and West wards of the city. This poll follows the industry standard of 1.96 standard deviation at a 95% level of confidence for a margin of error of plus or minus 3.7 percentage points. As sample size decreases, sampling error increases, therefore statements based on various population subgroups may be more subject to error than those based on the total sample available. To better express where the most emphasis should be placed, we have organized movement into two groups: Tier 1 and Tier 2. The first tier contains only movement with a difference greater than 8 percentage points from the previous year's findings and comprised of a sample size of 700, while the second tier includes all other subgroups which may contain less than 700 total respondents. All noted movement is compared directly to the findings of the 2017 survey.

The address-based sample for this study contained 61,202 records of Newark residents, broken down to 18,774 landline and 42,428 smart cell samples. The sample was generated by Survey Sampling International (SSI) a globally recognized, accredited, and established survey sample provider in the survey research industry. Survey respondents were randomly selected to participate and were contacted by a live survey interviewer through either their landline phone number or cellular phone number to respond orally. The sample is made up of 700 Newark residents; 92 completed via landline and 608 by cellular phone.

2017-2018 Newark Community Probability Survey Weighted Sample Demographics

Tier 1 Movement

T 1.1 Initial Good News for the Newark Police Department

Generally speaking, people feel safer (QSA2, QSA4) and are less worried about being the victim of a crime in Newark (Q6). More specifically, 54% of respondents feel "very safe" in their home at night, up 8 points from last year, and while 17% of residents feeling "very safe" walking around their neighborhood at night may sound low, this number is also up 8 points from last year. When it comes to feelings of safety at home men lead women 61% to 48%, and the Central ward reported the highest number of those who answered "very safe," with the North ward reporting the lowest (63% - 46% respectively).

Frequency of seeing police patrols had an effect on feelings of overall safety. Of those who have seen a police patrol once a day over the past month, 62% felt "very safe," whereas only 39% of those who saw a patrol once in the past month felt "very safe." The survey suggests that income level is not driving people's responses; when comparing general feelings of safety against income, we see that there is not much of a difference between those in the lowest bracket versus those who make greater than \$55k; for example, 20% of those who make 0-\$15k feel "not very safe" walking around their neighborhood at night compared to 21% of those who make more than \$55k. The same can be said when looking at how safe respondents feel in their home at night, with numbers not diverging too greatly based on income.

When asked how worried they are about being the victim of a crime, 15% of respondents said they were "very worried," a 13 point decrease from 2017, and 22% responded with "not at all worried," an 11 point increase. Frequency of seeing patrols did not appear to play a role in how worried respondents were of being the victim of a crime, however for those who were "somewhat worried" or "very worried" there was a nearly even split amongst those who wanted a decrease versus an increase in patrols. Respondents appear to be less worried about being the victim of a crime but are not yet ready to attribute that directly to the efforts of the NPD.

T 1.2 Mixed Signals on Neighborhood Safety and Policing Behaviors

Moving from safety in the home onto safety in the neighborhood at night, men once again lead women in feeling "very safe" 22% to 13%. The link between frequency of seeing patrols and the feeling of safety walking around at night is less clear than previously seen, and one possible takeaway from this difference is a fear that the Newark Police Department (NPD) will not quickly respond to a 911 call, according to the survey. Of those who feel "not safe at all" walking around their neighborhood at night, just 21% believe the NPD responds quickly to 911 calls "all of the time" while 46% believe the NPD "never" responds quickly. Compare this to the previous question about safety in the home at night, where of those who feel "very safe" 63% believe the NPD responds quickly to calls "all of the time."

When asked about the level of concern they felt regarding the possibility of excessive force being used on them if they were stopped by an NPD officer, a 9 point decrease can be seen in those who felt "somewhat concerned" (16%) and a 10 point increase in those who were "not at all concerned" (37%) (Q26A). Both genders are within a few points of each other on this question, as are all age categories. The racial breakdown of this question aligns Hispanic residents closer to white residents than black; 48% of white respondents said they were "not at all concerned" compared to 32% of black respondents and 42% of Hispanics.

To take this one step further, 27% of respondents said they were "not at all" concerned about excessive force being used on a family member, up 11 points from last year. Going back to one of the first questions covered, this works alongside the noted increase in general feelings of safety and decrease in fear of being the victim of a crime. In terms of race, 36% of white respondents were "not at all concerned" about the use of excessive force on a family member, followed closely by 34% of Hispanic respondents and then 19% of black respondents. Confidence that excessive force will not be used on a family member drops alongside a police officer's perceived knowledge of a resident's background. Thirty-six percent of those "not at all concerned" about the use of excessive force believe the NPD is "very" knowledgeable of their background or experiences, while just 17% of those who believe the NPD does not have any knowledge of their background are "not at all concerned."

T 1.3 How Individual Demographics Perceive Treatment by the NPD

In terms of how people perceive certain demographics to be treated, there was not much movement from 2017 in groups such as men, women, blacks, whites, and non-English speakers. Larger shifts can be seen in how two particular groups are perceived to be treated: Hispanics and those of the LGBT community (Q34F/Q34H). When asked if they think the NPD treats Hispanic/Latino people better, worse, or the same as other groups in the community, there was an 8 point decrease from 2017 in those who felt the Hispanic community is treated the same as others. When asked the same question about the LGBT community, there was an 11 point decrease in those who felt they were treated equally, as well as a 10 point increase in those who did not know.

Question 35A indicates that while respondents feel certain groups are not being treated equally, they appear to feel they are either separate from that mistreatment or simply do not consider themselves to be a victim of it. Compared to 2017, a 7 point decrease was seen when respondents said they feel discriminated against by the NPD "somewhat often," and an 8 point increase in those who said they were "not at all" discriminated against by the NPD because of who they are or how they identify. It seems that public perception of the treatment of certain groups has declined, and yet when it comes to examining their own personal experiences with the NPD, respondents are more optimistic. When looking at the racial breakdown of those who answered "not at all" to this question, 75% of whites feel this way compared to 55% of blacks and 59% of Hispanics. Despite respondents believing that Hispanic respondents do not feel discriminated against at all.

Furthermore, when looking at how the numbers break when compared against income, we see that those who make between \$0-\$15k are slightly less likely to say they experience no discrimination with 44% responding "not at all" in regard to whether or not they feel personally discriminated against by the NPD. Of those who make \$15k - \$35k, 61% also said "none at all" and 62% of those who make \$55k gave the same response.

T 1.4 Relationship Between NPD and Opinions of Newark

This brings us to our next observation, which examines the relationship between having a low opinion of Newark and the way in which residents view the performance of the NPD. Still using Q35A as a reference, 69% of respondents who rated Newark as an "excellent" place to live answered "none at all" when asked if they experienced discrimination by the NPD, compared to just 46% of those who answered "poor" when rating Newark. A similar pattern can be seen when looking at whether the respondent believes Newark has gotten better or worse. Of those who believe it has gotten better, 58% answered "not at all" in regards to experiencing discrimination from the NPD, as opposed to 44% from those who answered with "worse." It is tempting to assume that more patrols and greater police presence can lead to more negative experiences and that this may account for the respondents who are less likely to experience no discrimination, but when comparing these responses to frequency of seeing police patrols, this narrative does not hold true. In fact, the opposite appears to be closer to the truth, as 62% of respondents who reported seeing police patrols at least once a day in the past month answered "not at all" to feeling discriminated against by the NPD, compared to just 39% from those who saw a police patrol only one time in the past month.

The situation grows more interesting when looking at the movement seen regarding the main source of information about the Newark police. From the findings in 2017, there has been an 11 point increase in friends and family, a 16 point increase in word of mouth, a 27 point increase in social media, a 15 point increase in local newspapers, a 26 point increase in online, and a 16 point increase in government officials. Currently, 61% of respondents get their information from local TV news, while 68% of respondents get their information from social media as a main source of information has seen a significant increase from last year, whereas TV news has remained static. In addition to growing reliance on social media, going online to get information has also seen a nearly identical increase, with 66% of respondents saying they get information about the NPD from an online source. (QD22A, QD22E).

T 1.5 Information Sources and Impact on Perception

When comparing sources of information, certain trends emerge; of those who rely on social media for their information, 75% have no trust in the NPD while 47% of those who rely on TV news have no trust (QD22D/QD22A). Online does not follow this as dramatically as social media, but there is a small association between respondent's thoughts on the NPD's impact on lowering crime and their source of information. Perhaps a bit surprisingly, the difference is not too large amongst age demographics when it comes to who is more likely to rely on social media. Of those who get information about the Newark police through social media, 70% are between 18-24 and 71% are between 35-44. The number not unexpectedly drops a bit when looking at those who are older than 65, with just 51% of respondents that age using social media as a source of news. In addition to levels of trust, the likelihood to file a complaint also appears to be connected. Of those who get their information from social media, 79% have filed a complaint before. Similarly, 74% of those who go online for the information said they have filed a report before.

Along these lines, the difference between social media/online groups and TV news groups grows even more apparent when compared to how often they believe the NPD investigates complaints filed by residents, or properly investigates complaints against fellow officers. Of those who get their information from TV news, 67% believe the NPD investigates complaints filed by residents all of the time, and 65% believe the NPD investigates complaints against fellow officers all of the time. Compare this to those who get their information from social media, and a contrast emerges; 78% believe that the NPD investigates complaints filed by residents rarely, and the same percentage of respondents also believe the NPD investigates complaints against other officers rarely. There is a potential narrative wedge being driven between groups of people who consume traditional news media and groups of people who have accepted social media/online as their new conduit of information.

T 1.6 Lack of Positive Experiences and Negative Experiences with NPD

When asked to talk about their most memorable positive interaction with a Newark police officer, 83% of respondents said they have "never had a positive experience" with a Newark officer. This stands as a 48 point increase from last year. In comparison, when asked to describe

their most memorable negative experience with a Newark officer, 53% of respondents said they "never had a negative experience," a 13 point increase from last year. In both cases, no racial categories deviate more than a few points from each other, and the same can be said for gender, income, and rating of Newark as a place to live. The cause of these shifts cannot be precisely determined from the survey results. It is possible, for example, that the perception of what constitutes a "positive" or a "negative" interaction has changed since the 2017 survey. Because these increases are significant—particularly in the number of residents reporting never having had a positive experience with NPD—responses to these and similar questions should be tracked closely in future survey efforts.

T 1.7 Optimistic Economic Movement

There is encouraging movement when it comes to changes in the economic state of Newark. Of those who were asked if they are the chief wage earner in their household, 62% answered "yes." This is an 8 point increase from last year (QD4). Of those who answered yes, there were only marginal differences to be found in racial breakdown: those who graduated from college are slightly more likely to report being the chief wage earner, with 68% of college graduates responding "yes" compared to 60% from those who completed high school or less.

When looking at employment status in Newark, 58% of respondents said they were "employed full time" and 4% responded said they were "unemployed." This also marks an improvement from last year, with an 11 point increase in those who are employed full time and a 6 point decrease in those unemployed. Unlike the previous question, race plays a somewhat larger role; 45% of whites report full time employment, compared to 57% of blacks and 63% of Hispanics. Looking at the gender breakdown, 52% of women are employed full time compared to 64% of men. Disparity between wards also emerges; the Central, East and West ward all hover around the same number (60%, 63%, and 60% respectively), but the South ward comes in last with 49% of those from the area reporting full time employment (QD11).

The housing situation has also seen positive movement with 27% of respondents saying they own a house, 27% renting a house, and 37% renting an apartment. From last year, there has been an 11 point increase in those renting a house and a 9 point decrease in those renting an apartment (QD8A). Among black and Hispanic respondents, there is no significant difference when it comes to comparing the percentage of those who rent a house versus own a house, but

the gap widens but looking at white respondents. Of those who are renting a house, 22% are black compared 36% of white respondents who own a house.

Tier 2 Movement

T 2.1 Complaints Filed against NPD and Stop/Search Conduct

While the number of respondents who had reason to file a complaint with the NPD in the last 12 months was relatively the same, (12% in 2018 versus 9% in 2017, [Q21B]) the number of those in 2018 who ended up filing a formal complaint dropped by 12 points. Of those who did file a complaint, there was a 7 point increase in respondents being "very satisfied" (28%) and a 32 point increase in being "somewhat satisfied" (33%) with the result. It is worth remembering that the total number of respondents who filed a complaint in 2018 was just 36, meaning just a few people with more positive experiences caused a significant shift (Q21D). When those who did not file a complaint were asked to explain their reasoning, 38% of respondents said it was because they did not think it would make a difference, a 25 point decrease from last year, and a 14 point rise can be seen with 35% of respondents citing "some other reason" (Q21EM1).

When asked if a Newark police officer had stopped them in the last year, 11% of respondents said "yes, an officer has" and 87% said "no, an officer has not." For those who were stopped, this is a 10 point decrease from last year, and a 10 point increase for those who were not stopped (Q51C). For both those who were stopped and those who were not, there was no statistically significant difference when it came to the race of the person answering the question. When thinking back to the most recent time they were stopped by a police officer, respondents showed a 10 point decrease in feeling somewhat concerned about their own safety (12%), and an 11 point increase in not knowing (15%). Black respondents were a bit more likely to say they "don't know" as opposed to white respondents, and white respondents led black respondents 49% to 35% when answering "not concerned at all." Forty-six percent of Hispanic respondents also answered with "not concerned at all."

Further supporting this idea is Question 18C, in which respondents were asked to think back again to the most recent time in which they were stopped and whether or not the NPD officer explained why they were stopping them. There was a 9 point decrease in those who said "no" (23%) but a 7 point increase in those who did not know whether or not an NPD officer

explained their situation (16%). Sixty-three percent of white respondents said the officer explained the reason for the stop, along with 61% of Hispanics; only 51% of black respondents said they received an explanation.

T 2.2 Hispanic/Latino Residents May View NPD as More Legitimate Than Non-Hispanic Black or White Respondents

Certain findings indicate that Hispanic/Latino residents may view the NPD as more legitimate than non-Hispanic respondents who identify as black or white do.¹ For example, when asked about the most recent time they saw an NPD officer stop someone else, 45% of English-speakers believed the officer had a legitimate reason to stop that person, while 56% of Spanish-speakers and 65% of Portuguese-speakers believed the stop was legitimate. Similarly, while 43% and 45% of respondents identifying as solely black or white, respectively, believed the stop was legitimate, 54% of respondents identifying as Hispanic viewed the stop as legitimate. This is a reminder that one cannot assume that Hispanic residents and non-Hispanic black residents will fall into the same easily definable categories simply because they classify as minority demographics, and this should be kept in mind by the NPD moving forward.

When thinking back to the most recent time a respondent saw an NPD officer stop someone else, 47% felt the officer had a legitimate reason for the stop (Q19B), an 8 point decrease from last year. Still thinking back to this- stop, there was an 11 point decrease (Q25) from last year among those who felt "very concerned" for the safety of the person being stopped and searched (41%). When it came to whether or not an officer had a legitimate reason to stop someone, both black and white respondents were within a few points of each other (43% and 45% respectively) and 54% of Hispanic respondents answered "yes, officer had legitimate reason." All things considered, the positive movement seen here can be somewhat of a mixed bag in that the numbers are moving in the right direction, but there are still gaps to be conscious of; the data is not necessarily trending in a more negative direction, but one which potentially reflects a more aware and conflicted base and is certainly something to watch and study further.

¹ Respondents who identified themselves as "of Latino or Hispanic origin, such as Mexican, Puerto Rican, Cuban, Brazilian, Dominican, or some other Spanish or Portuguese-speaking background" were asked if they also consider themselves to be part of a racial category.

T 2.3 Areas to Watch Regarding NPD Behaviors

When asked how often they believe the NPD properly handles evidence, respondents seemed less sure this year than the last. Of those asked, 42% did not know, up 14 points from the previous year. In addition to that added uncertainty, 9% of respondents answered with "all of the time," a 9 point decrease (Q12A1). Thirty-one percent of white respondents say they "don't know," compared with 38% of black respondents and 50% of Hispanic respondents.

This pattern continues into one of the next questions where respondents were asked how often they believed the NPD made truthful or accurate statements, with 12% saying "all of the time" and 27% saying they did not know. Respectively this is an 8 point decrease and a 13 point increase from last year (Q12A3). Mirroring the previous question, the race categories for those who answered "don't know" are 6% of whites, 29% of blacks, and 28% of Hispanics. Black and Hispanic members of the community appear unsure of exactly how much trust they should have in the integrity of the NPD and their ability to fulfill their duties with honesty. Note that the sample size of this particular question set is 340, widening the margin of error to plus or minus 5.3 percentage points. This is worth noting when trying to understand the reservations that some people of color may hold when it comes to their trust in NPD officers.

Interestingly, despite general feelings of safety increasing, respondents were 13 points less likely to feel "more safe" when Newark Police officers are nearby as opposed to moments before they arrived, and 7 points more likely to say their feeling depends on the situation (Q17B). White (53%) and Hispanic (52%) respondents were slightly more likely to say they felt "more safe" when in the presence of a Newark officer as opposed to black respondents (45%). There is also a bit of a decrease when compared alongside the NPD's knowledge of residents' background or experiences; of those who feel "more safe" when in the presence of a Newark officer, 59% believe the NPD is "very knowledgeable" about their background or experiences, as opposed to the 40% who feel the NPD is "not at all knowledgeable."

The final point of observation related to this particular question is the relationship between residents feeling discriminated against and how knowledgeable they feel the NPD is of their background or experiences. Of those who feel the NPD is very knowledgeable, 67% responded with "not at all" when asked if they feel discriminated against by the NPD, versus only 49% of those who feel the NPD is not at all knowledgeable about their background or experiences. A similar trend can be seen when compared against how often respondents believe the NPD attends events in the neighborhood, with a drop in those who respond "not at all" to feeling discriminated against falling consistently alongside a decline in frequency of police attending events.

Final Observations

The NPD has a lot of movement to be proud of: fewer stops and searches this year, less fear of residents being victim to a crime, an increase in general feelings of safety, and more. Yet Newark appears to be a city that has grown more distrustful in the past year; while there have been no substantial drops in the level of trust given to the NPD, the people of the city are less willing to interact with their local officers, and more unsure than last year when it comes to a multitude of topics. The gap emerging between groups based on their sources of information speaks to the possibility of a greater trend which can be followed throughout this survey. The general feeling of safety has increased and the fear of being the victim of a crime has gone down. In spite of these developments, respondents feel less safe this year than last year while in the presence of an NPD officer, and are less inclined to believe that officers detain people only as long as possible or that they handle evidence properly.

The people of Newark want their police to reflect their community, they want those who protect them to also understand them, and to be truly aware of where they come from. NPD should continue its efforts to prove to the community that it is invested on the ground floor. This survey shows levels of comfort or positive experiences often rise alongside the amount of knowledge a resident perceives the NPD to have of their background or experiences. While it is not exactly a one-to-one relationship, this trend is significant enough to warrant an increased effort in focus on community relations. Residents must see the officers as integrated members of their community, not just protectors of it. Ultimately when thinking about the increasing reliance on social media and online media as a source of information, it would be wise to bolster the online presence of the department in a major way. Consider creating an Instagram page to reflect positive interactions within the community and have this be the image projected to residents: that the NPD are neighbors and members of the community first, and enforcers second. The pros of an increased presence on social media far outweigh the cons when remembering that the accounts are free; if this idea is acted upon, it would be helpful to designate an expert social media professional to head up the accounts and keep the content consistent across all platforms to ensure quality control. The NPD currently has a Twitter account, but the content is impersonal and related more to community safety updates; new content projecting positive interactions with the NPD among the community can also be presented on Twitter to increase coverage, as this would also fall under the control of the social media professional.

Recommendations Moving Forward

Newark residents appear to relate their personal opinions of the quality of life in Newark to their perceptions of the NPD itself; when looking at how often respondents felt they experienced discrimination from a Newark police officer, the number of those who responded with "not at all" consistently dropped alongside their rating of Newark in general. As the ratings lowered, the number of people who reported experiencing no discrimination mirrored the decline. The responsibility of improving residents' opinion of Newark as a whole cannot completely fall to the NPD, but in working to address the lack of connection between Newark officers and the residents, the NPD may consider hosting more public events. These do not have to be large scale and could even be charitable in nature, such as 10k races to raise money for certain causes, as well as having a barbecue or food component alongside these events. In addition to this, the NPD could also consider hosting cultural highlight days in which certain people may cook and bring food traditional to their own cultures and share stories with Newark officers over a meal. Not only would hosting charitable events legitimately benefit the community by fostering peace and connectivity, but events such as these will show a side of the NPD beyond policing. The NPD has already shown a willingness to host events such as "Pop-up Community Talks" which allows greater connection between the department and the community, so increasing the frequency and variety of such events could prove beneficial. These events should appear to be spontaneous to the community but rolled out methodically by the department. In addition, if a resident is willing to approach a Newark officer with an issue, the department must ensure that the resident's issue is directly addressed and even if a solution is not immediately available, the resident should feel heard and experience a follow up to ensure connectivity between the department and those willing to speak about their concerns.

In addition to the previously stated recommendations, the NPD may also consider consolidating all efforts moving forward under the umbrella of one specified branding campaign: "A New Arc for Newark." Stylized as *NewArc*, this granular branding campaign would openly outline the new points being addressed by the NPD going into the future and put a transparent face towards the community during the NPD's efforts to address their concerns. The points along the "Arc" would include an Instagram page, charity events, personal video testimonials and postings from citizens (about how a recent event saved their life), church related events, and

food/culture socials. This new "Arc" could show a major improvement for an urban city and ultimately become a national model.

There is progress being made, but there are also subgroups of people who have not yet been convinced that this progress has reached them. The main concern facing the NPD should be keeping this momentum going in the right direction and upping their social media communications to project a more understanding and welcoming face to the community; this new face must in turn be bolstered by continued improvement in police practices. If the people of Newark see their police department investing time into the community for no reason other than it is the right thing to do, that will be a step forward reaching the residents who are unsure of where they stand in regard to their thoughts on the NPD.

In Summary

- NPD should focus on increasing the connection between the community and the department.
- Address the lack of connection between individuals in the community and members of the NPD by hosting local events. Special focus should be given to highlighting the culture of those in the community and allowing them to feel welcome.
 - For example, potlucks with emphasis on food traditional to the culture of the household, that projects a positive face for the NPD by "breaking bread".
- Keeping in mind the increased reliance on social media and online platforms for news, the NPD may consider bolstering its presence on such platforms.
 - People in Newark seem to put greater weight behind what they see and hear on social media as opposed to their own personal perceptions, so an increased presence on online platforms could allow the NPD a chance to highlight positive interactions between the department and the community, allowing greater control over the narrative they project.
 - Consider designating an expert social media professional to head up the accounts, placing greater emphasis on community interactions.
 - In addition, an emphasis should be placed on filming NPD officers interacting with their community in day to day activities, with a special focus placed on capturing church-related events.

- Testimonials may also be included from Newark residents with particularly powerful or moving stories and posted on all social media platforms, highlighting moments between residents and NPD officers who went provided a service that was very much needed. This can be posted in the form of a short video, or a photo of the resident along with a caption quoting their retelling of the interaction.
- While a strong image is important, do not forget to back up these claims with continued, legitimate improvements police practices.
 - Encouraging movement has been observed since 2017, and this momentum must continue if there is to be any weight behind the image the NPD conveys.
- "A New Arc for Newark." *NewArc* branding campaign outlining efforts being made by the department to directly address concerns of the community.
- Suffolk University was commissioned to exactly replicate the Rutgers 2017 survey questions but recommends the addition of questions about individual politicians (including boards, city leadership etc.) to examine and further explain the disparity between NPD relations and perceptions, and to more broadly define the relationship between residents and the city as a whole.

Q32 In just a few words, what is one thing the Newark Police should do differently to improve police-community relations?

Answered: 65 Skipped: 16

#	RESPONSES	DATE
1	Stop harassing us and being disrespectful. We are humans!	12/17/2018 12:32 PM
2	Stop harassing people and look for people who are doing stuff.	12/17/2018 12:30 PM
3	Treat everybody equally.	12/17/2018 12:24 PM
4	Get involved in community organizations. Eyes and ears of neighborhood.	12/17/2018 12:22 PM
5	Get involved in community	12/17/2018 12:18 PM
6	Come out and meet and greet!	12/17/2018 12:10 PM
7	Treat people they way they want to be treated.	12/17/2018 12:07 PM
8	Frequent neighborhood more get to know them by name	12/17/2018 12:07 PM
9	COMMUNICATE!	12/17/2018 12:04 PM
10	More community initiatives people think police are the enemy so being more involved would help	12/17/2018 12:03 PM
11	Kids shouldn't be scared of cops. Try to sole real crimes; is it a quota system. Not protect and serve - now just patrol. Cops need to know the kids. Rookies shouldn't be out here.	12/17/2018 12:01 PM
12	Less aggressive in their interactions they think the uniform keeps them safe so they treat people worse	12/17/2018 12:00 PM
13	Talk better w/more respect to folks.	12/17/2018 11:56 AM
14	More interaction with community; everybody are not in the gang	12/17/2018 11:55 AM
15	Be more present and culturally sensitive when performing their duties and sharing with people how to prevent contact w/police dept.	12/17/2018 11:52 AM
16	Stop pulling us over for random checks	12/17/2018 11:50 AM
17	More communication, relaxed cituation, a part of common events	12/17/2018 11:49 AM
18	Be more on foot and present in community.	12/17/2018 11:46 AM
19	have been pulled over for a non-existant sign.	12/17/2018 11:43 AM
20	More police and avoid bringing people in as informants	12/17/2018 11:37 AM
21	Respectful communications with local community and culturally responsive/sensitive training	12/17/2018 11:33 AM
22	More patrol in the community. I think they should ask questions before pulling out guns on people.	12/17/2018 11:30 AM
23	I don't know, never had any contact with any officers to know.	12/17/2018 11:27 AM
24	To help the community	12/17/2018 10:56 AM
25	I believe things are just fine.	12/17/2018 10:28 AM
26	Get to know people	12/17/2018 10:22 AM
27	More police on foot, in cars.	12/14/2018 6:35 PM
28	More patrols. IDK	12/14/2018 6:32 PM
29	Learn how to talk to people	12/14/2018 6:18 PM
30	Make it a priority to talk to people about what goes on in the neighborhood. Respect people.	12/14/2018 6:13 PM
31	More police, talk to community members.	12/14/2018 5:38 PM
32	Get to know members of community. Build trust.	12/14/2018 5:34 PM

Case 2:16-cv-01731-MCA-MAH Document 158-1 Filed 08/09/19 Page 172 of 179 PageID: City of Newark Consent Decres 2018 Community Survey

33	Listen	12/14/2018 5:31 PM
34	Patrol on foot. Don't assume everyone is on drugs or is a dealer. Some people are sick. Have more respect for the seniors. They don't correct their mistakes. They don't admit when they make a mistake.	12/14/2018 5:27 PM
35	Do their job. Be more active with the public. They should live in the neighborhood.	12/14/2018 5:23 PM
36	Investigate major crimes rather than harass people on corner.	12/14/2018 5:14 PM
37	Increase 5-0 walking on the streets, show their faces and not just ride in a car	12/14/2018 4:52 PM
38	Keep on the body cameras	12/14/2018 4:49 PM
39	Have more than two officers in an area; only see once every couple of hours as opposed to every couple of minutes	12/14/2018 4:48 PM
40	They should take drugs off of the street	12/14/2018 4:40 PM
41	Do better.	12/14/2018 4:38 PM
42	Nothing	12/14/2018 4:35 PM
43	Keep talking to each other.	12/14/2018 4:33 PM
44	Speak to the people!	12/14/2018 4:31 PM

Appendix E

STATUS OF NPD'S CONSENT DECREE TRAINING

Training	Status	
Community-Oriented Policing ¹	NPD reports that training has been administered to all relevant NPD officers.	
Body-Worn and In-Car Cameras	NPD reports that training has been administered to all relevant NPD officers.	
Use of Force	NPD reports that by the end of March 2019, training had been administered to all relevant NPD officers.	
Stops, Searches, and Arrests	NPD reports that by the end of April 2019, training had been administered to all relevant NPD officers.	
Bias-Free Policing	Mid-Level Management session held on April 30.	
	Two-day course for Command-level officers and community members held May 1 – May 2.	
	Train the Trainer sessions held May 14 – May 15.	
Internal Affairs	NPD is developing an internal affairs investigations procedural manual in collaboration with DOJ's vendor. It will need to develop training materials based on this manual.	
	DOJ provided draft training materials to the Monitoring Team on July 2.	
Property and Evidence Management	NPD needs to develop a procedural manual and training reflecting Consent Decree-compliant practices.	

The following chart notes the status of Consent Decree-related training.

¹ NPD administered Community-Oriented Policing training to its officers prior to completing its Community-Oriented Policing policy.

	Search Warrant ("Searches")		(Effective January 10, 2019)
GO 18-16	Arrests With or Without an	Paragraph 5; Section VI	December 31, 2018
	Arrest Warrant ("Arrests")		(Effective January 10, 2019)

GO#	Subject	Consent Decree Provision	Date Adopted by NPD
GO 18-13	Community Policing	Section V	April 4, 2019
			(Effective April 4, 2019)
GO 18-24	Property and Evidence Division	Paragraph 110	April 3, 2019
			(Effective April 3, 2019)
GO 18-23	Property and Evidence Management	Paragraph 110	April 12, 2019
			(Effective April 12, 2019)
GO 19-03	LGBTQI Community & Police	N/A	April 3, 2019
	Interactions ¹		(Effective April 3, 2019)
GO 18-12	First Amendment Right to	N/A	June 12, 2019
	Observe, Object to, and Record Police Activity ²		(Effective June 12, 2019)

¹ Although the Consent Decree requires NPD to "operate without bias based on any demographic category," *see* Consent Decree § VII, it does not require a standalone policy to address the LGBTQIA community. To help institutionalize its practices, NPD decided to draft a policy dedicated to its stop, search, and arrest of these community members.

² The Consent Decree requires NPD to respect the public's First Amendment right and prohibits officers from taking certain actions to discourage the exercise of these rights. Consent Decree ¶¶ 55-62. It does not expressly require NPD to create standalone policy to this end, but NPD endeavored to do so.
